Thornhill, ON L4J 8K2, Canada

EDUCATION

York university

2018 – 2022

Bachelor of Computer Science (BSC)

SKILLS

- ***Languages:*** JavaScript, TypeScript, Python, PHP, Ruby
- ***Frontend:*** React, Next.js, Angular, Vue, Svelte, Tailwind CSS, Ant Design
- ***Backend:*** Node.js, Nest.js, Laravel, Ruby on Rails, GraphQL
- ***Testing:*** Jest, Vitest, Cypress, Playwright, RSpec
- ***Databases:*** PostgreSQL, MySQL, MongoDB, Redis
- ***Cloud & DevOps:*** AWS, Azure, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD
- ***APIs & Services:*** REST, GraphQL, Apollo, Firebase
- ***AI / ML:*** OpenAI, Google AI, LLMs, RAG, AI Agents, AI APIs, LangChain, LangGraph, Vector Databases, MCP
- ***Project Management:*** Agile, Scrum, Git, Jira, Trello, Basecamp, Asana.
- ***Web Design | Image Generation & Correction***
- ***Multimedia Generation & Video Editing***

OVERVIEW

- Highly efficient and reliable Senior Software Engineer with 9+ years of experience delivering scalable, high-performance solutions, with deep expertise in system architecture, full-stack development, cloud-native technologies, AI/ML integration, Agile practices, and technical leadership.
- Strong capabilities in web design, image generation and correction, and professional video editing, combining engineering expertise with refined visual and creative skills to create engaging digital experiences.
- Specialize in transforming complex ideas into polished software, responsive web experiences, AI-assisted visual content, and compelling multimedia solutions that deliver meaningful value for innovative businesses and clients.

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER

Sumvid Solutions | 2025.9 - Present

Technologies: Python, TypeScript, React, Node.js, PostgreSQL, Redis, Docker, Kubernetes, AI APIs, Vector databases, CI/CD

- Designed, developed, and deployed scalable cloud-native applications using modern full-stack technologies, microservices, APIs, containers, and serverless architectures.
- Led the end-to-end software lifecycle, including architecture, development, testing, CI/CD, cloud deployment, observability, and production support.
- Architected secure, highly available, and high-performance solutions using AWS, Azure, GCP, Kubernetes, Docker, Infrastructure as Code, and modern DevOps practices.
- Integrated AI and generative AI capabilities, including LLMs, RAG, AI agents, and intelligent automation, while also leading legacy modernization, cloud migration, and distributed systems architecture.

SOFTWARE ENGINEER

Document 360 | 2024.7 – 2025.8

Technologies: TypeScript, React, Node.js, Search indexing, AI APIs, Vector search concepts, Authentication, Cloud hosting

- Contributed to Document360 as a Full-Stack Engineer focused on building scalable documentation and knowledge-management features.
- Developed React/TypeScript interfaces and Node.js backend services, including APIs, authentication, search indexing, and cloud-hosted components.
- Integrated AI APIs and vector-search concepts to enhance semantic search, intelligent content discovery, and AI-powered knowledge-base capabilities..
- Searched technology, cloud engineering, and AI integration to deliver secure and intelligent documentation solutions.

SENIOR FULL STACK DEVELOPER

Tines | 2023.3 – 2024.6

Technologies: TypeScript, React, SVG or Canvas, Drag-and-drop, APIs, Job queues, Databases, WebSockets

- Designed and developed core components of an Automation Platform using TypeScript and React, with a focus on scalable workflow-building experiences.
- Built interactive workflow editors using SVG/Canvas and drag-and-drop interfaces, enabling users to visually create, configure, and manage automated processes.
- Developed API integrations, background job queues, database-driven services, and WebSocket-based real-time communication to support reliable workflow execution and live status updates.
- Contributed to the overall platform architecture, performance, and scalability while delivering robust automation capabilities across the full application stack.

PASSIONS

Communicator

The 9 years of working remotely in distributed teams have taught me that communication is key to successful teamwork.

Active

I am not afraid to give new ideas on the project, workflow, or company culture.

Collaborative

I enjoy helping my team members grow by sharing new knowledge, best practices, and useful resources.

SENIOR FULL STACK DEVELOPER

Appy Pie | 2021.11 – 2023.2

Technologies: Typescript, React, Drag-and-drop interfaces, REST APIs, Cloud storage, Authentication

- Contributed to the development of an AI App Generator, building scalable and intuitive application-generation experiences with TypeScript and React.
- Designed drag-and-drop interfaces that enabled users to visually create, configure, and customize application components with minimal coding.
- Developed REST APIs and integrated authentication and cloud storage to support secure application generation, configuration, and project management.
- Contributed to the overall platform architecture, ensuring a reliable, scalable foundation for AI-driven application development and deployment.

FULL STACK DEVELOPER

Hopin | 2020.9 – 2021.10

Technologies: React, Node.js, WebRTC, WebSockets, Media servers, Cloud infrastructure, Authentication, Real-time messaging

- Contributed to the development of a real-time Virtual Event Platform, building interactive web experiences with React and Node.js.
- Developed real-time video and audio communication using WebRTC, WebSockets, and media servers, enabling reliable virtual sessions and live participant interactions.
- Implemented authentication, real-time messaging, and cloud infrastructure to support secure, scalable event experiences.
- Contributed across the frontend and backend stack to deliver a responsive, reliable, and highly available platform for large-scale virtual events.

WEB DEVELOPER

Setapp | 2019.10 – 2020.8

Technologies: Javascript/Typescript, React, Backend APIs, Payment systems, Role-based permissions, Database design, Responsive web design

- Contributed to Setapp for Teams by building responsive, user-friendly web interfaces using JavaScript/TypeScript and React.
- Developed and integrated backend APIs supporting team management, subscriptions, payments, and secure user workflows.
- Implemented role-based permissions and database structures to support organizations, teams, users, and access control.
- Focused on responsive design and seamless frontend–backend integration to deliver a reliable experience for teams managing their software subscriptions.
